Collecting Horsehair

A bracelet requires about a pencil's width of tail hair 16-18" long and 2 pencil's widths of hair for a double strand bracelet.

A necklace requires about a pencil's width of tail hair 24" long or alternatively two pencil's widths of tail hair 14-16" long.

All of the hairs must be this length. Cut the longest hairs a few at a time near the tail bone. Band them at one end and place in a plastic bag labeled with the horse's name. An alternative to cutting hairs is to pull the tail hairs a few at a time similar to pulling a mane. This does not hurt the horse. Please wash the hair and let dry 24 hours before bagging. It will be sterilized as part of the bracelet making process.
